CD-ROMs
PDF Manuals

Printed Manuals

Body

Breast

Cardio

Neuro

Onco

Ortho

Vascular

MR System

Coils

CD-ROM Operator Manuals

All standard documentation as pdf files,
including Adobe Acrobat full text search

Scanning and postprocessing

Basic scanning and postprocessing functions of the syngo MR software

System and data management

Description of data management, system administration and configuration

Body

Description of typical workflows (preparation, measurement, and post-processing)

Breast

Description of typical workflows (preparation, measurement, and post-processing)

Cardio

Description of typical workflows (preparation, measurement, and post-processing)

Neuro

Description of typical workflows (preparation, measurement, and post-processing)

Onco

Description of typical workflows (preparation, measurement, and post-processing)

Ortho

Description of typical workflows (preparation, measurement, and post-processing)

Vascular

Description of typical workflows (preparation, measurement, and post-processing)

System Owner Manual

Compilation of important documents (e.g., maintenance, data sheet, EMC declaration)

MR System

Detailed description of how to operate the MR system

Coils

Detailed description of RF coils, including quality assurance

CD-ROM Supplements

Optional documentation as pdf files,
including Adobe Acrobat full text search

Magnets, Spins, and Resonances

An introduction to the basics of magnetic resonance tomography

Magnets, Flows, and Artifacts

Basics, techniques and applications of magnetic resonance tomography

MR Glossary

Important MR terminology and brief explanation

Basic Manual syngo

Detailed description of the syngo software

Parameters and image text

Detailed descriptions of scanning parameters and image text

Pulse Sequences

Brief description of all pulse sequences, including the most important parameters

Basic Manual Spectroscopy

Basics, measurements and evaluations in MR spectroscopy
